Rainy River District Transportation Services Consortium

RRDTSC New Logo

On March 28 2013, the Rainy River District Transportation Services Consortium presented two students, in front of a jam packed Donald Young School gym, with the honor of being the creative minds behind the new RRDTSC logo. Emma Dykstra and Pasquel Shortreed were the recipients of the RRDTSC Logo Contest Award. Choosing a winner was very difficult as the RRDTSC received many imaginative and artistic designs. The new logo can be seen above. Great job Emma & Pasquel!

New Transportation Requests

Any new request for school transportation services, cancellation request or change request related to a student's personal information must be made, by the parents and/or guardians, through the school using the Student Transportation Information Form F11.

Walk Distances to School

Transportation may normally be provided in the following situations:

- Secondary students living a greater distance than 3.2 kilometres on route travelled to the attended school.
- Elementary students in Grades 1 to 3, living a greater distance than 1.0 kilometres on route travelled to the attended school.
- Elementary students in Grades 4 to 8, living a greater distance than 1.60 kilometres on route travelled to the attended school.
- Junior and Senior Kindergarten pick-up and drop-off shall be arranged to and from primary residence with consideration to safety, accessibility and traffic patterns.

A student's address is his/her legal and permanent place of residence. In the case of joint custody it is the parents responsibility to decide on the **students primary address**, in order to determine his/her school catchment area.

***Please note that the address of a caregiver or daycare centre cannot be considered a student's legal and permanent address.**

The measurement of walking distance is from the closest point of the property line of the student to the property line of the school. All measurements for transportation services will be made by RRDTSC using Edulog Transportation Software.
